Subject RE: EE/CA objectives

Chris - my apologies for the slow response; we've been a bit busy this week with the on-site soils work plan addendum, which you'll get electronically later today.

Status report:

EE/CA RAOs - we've circulated a draft to our client, and are now revising based on their comments; you should see our proposed RAOs next week. FYI, based on OPOG input, the RAOs will closely match the Performance Standards that are in the CD (page 7).

EE/CA Outline - we did not intend to re-send a revised outline to you. We are comfortable with your comments, and are proceeding full speed ahead with the EE/CA report.

Dave

Subject: EE/CA objectives

Chuck and Dave,

Please provide the status of the EE/CA objectives and revised outline. Based on our 3/21/05 call, I understood that the objectives would be provided by 4/1/05. Thanks,

Chris
